Full Stack Engineer, now focusing on the Elixir side of things. Experienced in Web development, integration/deployment, testing and adaptability on learning new things.

Experience

Full Stack Engineer

[Boogiebrands](#) - New York, United States

JULY 2020 - PRESENT (full-time, remote)

- Spearheaded the project Nappy.co (like Unsplash but for Black & Brown) with major improvements to user experience and site reliability. Also created a tool for migrating our MySQL data to Postgres and learning to build tools for automation, docs and simple ETL stuff.
- For our use case, it doesn't warrant adding a libcluster/horde for clustering nodes or distributed apps because our traffic is low. Deployed using fly.io (with managed db) to shift our focus on app development.
- *Skills: Elixir/Phoenix/LiveView, Full Stack Development, CI/CD, TDD, REST APIs, Postgres, Docker, Git, Php*

Full Stack Engineer

[City Government of Davao \(CITC\)](#) - Davao, Philippines

MAR 2023 - JUN 2023 (contract, on-site)

- Spearhead and modernizing their current development workflow, onboarding teams and preparing them up for a cloud-ready infrastructure and at the same time working on new projects for them.
- *Skills: Relational Databases, Web Services, Software as a Service (SaaS), Containerization, Version Control, Full-Stack Development, CI/CD, REST APIs, Test Driven Development*

Secondary Teacher (GCSE 0478 & 0417)
